MySQL query:

```
select
    average_spend_Accepted, average_spend_Rejected,
total_number_items_Accepted,
total_number_items_Rejected
from
    (select
        sum(totalSpent)/count(_id) as
average_spend_Accepted, sum(purchasedItemCount) as
total_number_items_Accepted
    from
        receipts
    where
        rewardsReceiptStatus == 'FINISHED' or
rewardsReceiptStatus == 'FLAGGED') as a
cross join
    (select
        sum(totalSpent)/count(_id) as
average_spend_Rejected, sum(purchasedItemCount) as
total_number_items_Rejected
    from
        receipts
    where
        rewardsReceiptStatus == 'REJECTED') as b
```
